“Reform” is an exhibition of 7 Thai artists in the name of “Somwang Group”, reflecting individual changes affected by the globalization movement of new innovations and ideas created everyday. The show presents how these developments have guided Thai artists’ visions and consciousness through their art. Each artist’s specific character is a result of forward thinking and fuses today’s innovative methods in art. The borders that define art from other kinds of knowledge have disappeared. Moreover, while the art world has been progressing forward, interest in the spiritual dimension that comes with religion and belief remains, presenting the modern concept of Thai society in harmony.

The Reform exhibition arose from the connection between Eastern and Western cultures with the belief that past and present are keys to an individual form of art.
